

Metal A-Frame

stelco

❖ STELCO Metal A-Frame

The STELCO sidewalk A-frame sign is manufactured from durable steel that can be displayed indoors and outdoors, day and night.

This double-sided A-frame is ideal for attracting new customers from any direction. Graphic exchange is easy as the A-frame has a simple slide-in design and can accommodate Coroplast signs up to 1/4" thick. The signs do not need to be removed for storage.

It is easy to set up or take down these A-frames as they come fully assembled and ready to use. They are supported by two metal hinges which fold down so that the unit collapses and then stored when not in use. The powder coated black frame blends in with any print design, and is rust-resistant.

The STELCO A-frames are very reasonably priced.

Although extremely popular with real estate agents, these signs work effectively when used in:

- Restaurants
- Travel agencies
- Shops and shopping malls
- Special events
- Real estate sales
