

# Rotomolded Vertical Case

centuro

## ❖ CENTURO Vertical Case

The sturdy CENTURO hexagonal rotomolded case on wheels is ideal for all types of storage and shipping applications.

It features an easy grip handle and built-in wheels for smooth transport and manoeuvrability.

Multiple cases can be placed together with minimal wasted space because of its "square" shape and inline wheels.

When used normally and not abused, the case is almost unbreakable and is ideal for shipping freight nationally and internationally.

Add a fitted wooden top and wrap around graphics and convert the case into a convenient counter or a display pedestal at a trade show.

Great for shipping and storing items such as:

- Poppers and tension fabric popups
- Rollup and x-banner stands
- All kinds of printed graphics
- Product samples
- Plastic floor tiles

### BENEFITS & SPECIFICATIONS

- Durable rotomolded construction for product protection.
- Two sturdy wheels for easy mobility.
- Removable lid for easy installation of product.
- Add a fitted wooden top for displays (not included).
- Two lockable catches hold lid to base.
