## ❖ ENDURO Tension Fabric Popup

Catch your audience's attention with an ENDURO tension fabric popup. It is a great tool to create impact and an impression for marketing and advertising.

It is amazingly lightweight, yet durable and takes only one person to set it up in about 3 minutes. There are no magnets to attach to the frame and no panels to hang!

They are manufactured from SQUARE aircraft aluminum tubing enabling opening and closing effortless. The square tubing has more contact with the connectors which add to the stability of the display.

A full colour dye sublimation mural graphic panel attaches to the aluminum frame with Velcro and stays attached even when stored in the carry bag or trolley case saving the exhibitor time and effort the next time the display is used. When it is set up, the graphic is automatically stretched to a smooth surface.

This entire popup display system fits into one small carry bag or trolley case for convenient transportation, and can be easily transported in the trunk of a car.

They are ideal for locations such as shopping malls, car showrooms, trade shows, conventions and road shows.

### BENEFITS & SPECIFICATIONS
