9mm Block Out PET

olio

❖ OLIO 9mm Block Out PET

The **OLIO** 9mil block out PET with grey back and matte print surface is designed for rollup banners and works with economy banner stands such as **AMBRO** as well as other better quality stands.

Not using **OLIO** 9mil block out PET with grey back can cause the economy stands to lean forward or worse still, catastrophic failure of the stand.

The block out feature of the media has a darkening effect so that no light comes through the printed surface ensuring that the image is sharp and easily visible. When printing, the ink is quickly absorbed into the PET and dries quickly avoiding any smudges.

The material is flexible, tear resistant and very importantly is non curling on the sides so that the banner and image is displayed to its best effect. It is also ECO friendly.

OLIO is suitable for use with all kinds of wide format printers using solvent ink, Eco solvent ink, mild solvent ink, latex ink, and UV inks.

It is great for use on:

- Billboards
- Hanging and rollup banners
- In-store displays
- Exhibition booths

BENEFITS & SPECIFICATIONS

- 9mil/330g block out grey back PET with a matte finish.
- Smooth white opaque substrate for high resolution print.
- No-curling at the edges and lay-flat appearance.
- UV resistant to fading ensuring vivid graphics longer.
- Weather and tear resistant for longevity.
- Compatible with all kinds of wide format printers.
- Quick to absorb ink and quick to dry.
- Wound on a 3" core and boxed.

13oz Block Out PVC

❖ ELCO 13oz Block Out PVC

The **ELCO** 13oz scrimless non-curling PVC banner material is designed for printing rollup banners.

It is a super smooth one side printable non-top coated matte media with a grey polyester back that provides opacity and obstructs light.

When printing, the ink is quickly absorbed into the PVC and dries quickly avoiding any smudges.

It is the “go to” non-curl media for regular and premium rollup banners. The material is flexible, tear resistant, ECO friendly and offers a high level of performance for short to medium term indoor, outdoor and general signage applications.

ELCO is suitable for use with all kinds of wide format printers using solvent ink, Eco solvent ink, mild solvent ink, latex ink, and UV inks.

It is great for use on:

- Billboards
- Hanging banners
- Rollup banners
- In-store displays
- Exhibition booths

BENEFITS & SPECIFICATIONS

- 13oz block out smooth grey back PVC with a matte finish.
- White opaque substrate for high resolution print image.
- No-curling at the edges and lay-flat appearance.
- UV resistant to fading ensuring vivid graphics longer.
- Compatible with all kinds of wide format printers.
- 250*250D, 36*36/sq.in, 440g tear resistant structure.
- Quick to absorb ink and quick to dry.
- Wound on a 3” core in a cardboard tube.

13oz White Back PVC

deco

❖ DECO 13oz White Back PVC

DECO 13oz white back block out PVC is a high-quality opaque banner material which is compatible with solvent, eco-solvent, latex and UV printers.

The material is **WHITE** backed to allow for two side printing in applications like rollup banners, scrolling banner stands, tradeshow, events graphics, POP and any hanging banner or sign where banner opacity is needed.

The super smooth surface makes it perfect for high resolution printing, the high opaque for two sided printing without see through while the non-curling nature of the material perfect for applications where a professionally perfect image is desired.

The quality of **DECO** is such that with its capability of good ink absorption, superb flexibility and UV resistance it is suitable for indoor and low stress outdoor advertisement with exceptional results.

It is great for use on:

- Billboards
- Hanging banners
- Rollup banners
- In-store displays
- Exhibition booths

BENEFITS & SPECIFICATIONS

- 13oz block out **WHITE** back PVC with a matte finish.
- 100% opaque substrate for two-sided printing.
- No-curling at the edges and lay-flat appearance.
- UV resistant to fading ensuring vivid graphics longer.
- Compatible with all kinds of wide format printers.
- 300*300D, 18*18/sq.in, 440g tear resistant structure.
- Quick to absorb ink and quick to dry.
- Wound on a 3" core in a cardboard tube.
